Fruit Party 2 Slot Game Overview

The bet sizes available in Fruit Party 2 range from 20p

to £20.

This game does not feature paylines, instead using a Cluster

Pays

mechanic.

Tumble Feature

During a tumbling sequence, winning combinations are paid and

all winning symbols disappear after every spin. Remaining s

ymbols drop to the foot of

the screen, and the vacant spaces are filled by new symbols

falling down from

above.

When a tumble fails to result in a new winning combination being create

d, the

sequence ends. Your account is then credited with any winni

ngs you achieved

Random

Wild Multiplier Feature

When you play this online slot game, a Wild symbol may be le

ft

behind at random when a cluster of symbols hits and explodes. The Wild

symbol will take

up an empty space.

Whenever a Wild generated by a winning cluster is displayed at

first, it will be accompanied by a 2x multiplier. This mult

iplier will then take effect

on any future winning clusters that it is involved in.

If this Wild symbol is part of a

winning cluster, it may be randomly shown again after the explosion &

has taken place. If

this happens, it will carry a 4x, 8x, 16x, 32x, 64x, 128x or 256x mult

iplier,

progressively increasing if it appears again afterwards.

If at least two Wild symbols

are involved in winning cluster, their multipliers are added

together and the cluster

win is multiplied by this sum.

If the same Wilds are included in at least two clusters,

their multipliers will take effect on all of the clusters t

hat they contribute to.
