<p>Lowball or low poker is a variant of poker in which the normal ranking of hands is inverted. Several variations 🫦 of lowball poker exist, differing in whether aces are treated as high cards or low cards, and whether straights and 🫦 flushes are used.</p>
<p></p>
<p>Low-poker ranking [edit]</p>
<p></p>
<p>Lowball inverts the normal ranking of poker hands. There are three methods of ranking 🫦 low hands, called ace-to-five low, deuce-to-seven low, and ace-to-six low. The 'ace-to-five' method is most common. A sub-variant within this 🫦 category is 'high-low poker', in which the highest and lowest hands split the pot, with the highest hand taking any 🫦 odd chips if the pot does not divide equally. Sometimes straights and/or flushes count in determining which hand is highest 🫦 but not in determining which hand is lowest, being reckoned as a no-pair hand in the latter instance, so that 🫦 a player with such a holding can win both ways and thus take the entire pot.</p>
<p></p>
<p>Lowball variants [edit]</p>
<p></p>
<p>The 🫦 most popular forms of lowball are ace-to-five lowball (a) Tj T* BT /

hand at that form is 5-4-3-2-A. In ace-to-five lowball straights 🫦 and flushes do not prevent a hand from being low. You win by simply having the five lowest cards. Deuce-to 🫦 seven lowball gets its name because the best hand at that form is 7-5-4-3-2 (not of the same suit).[1]</p>
<p></p>
<p>Ace-to-five low 🫦 is the most common method for evaluating low hands in poker, nearly universal in U.S. casinos, especially in high-low split 🫦 games.</p>
<p></p>
<p>As in all low hand games, pairs count against the player. That is, any hand with no pair defeats any 🫦 hand with a pair; one pair hands defeat two pair or three of a kind, etc. No-pair hands are compared 🫦 starting with the highest-ranking card, just as in high poker, except that the high hand loses. In ace-to-five low, straights 🫦 and flushes are ignored, and aces play as the lowest card.</p>
<p></p>
<p>For example, the hand 8-5-4-3-2 defeats 9-7-6-4-3, because eight-high is 🫦 lower than nine-high. The hand 7-6-5-4-3 defeats both, because seve
