

# plataforma bet

&lt;p&gt;TELVM wrote: Yep looks more or less in the ballpark to me, mid way betw  
een a Coppermine&lt;/p&gt;  
&lt;p&gt; and a Tually.&lt;/p&gt;  
&lt;p&gt;Nice &#127772; scores!&lt;/p&gt;  
&lt;p&gt;That Coppermine score is a bit too close to the performance&lt;/p&gt;  
&lt;p&gt; of my Celeron 1400@1635 system for my liking.&lt;/p&gt;  
&lt;p&gt;But things &#127772; are changing fast over here&lt;/p&gt;  
&lt;p&gt; &#128513;&lt;/p&gt;  
&lt;p&gt;...&lt;/p&gt;  
&lt;p&gt;...&lt;/p&gt;  
&lt;p&gt;...&lt;/p&gt;  
&lt;p&gt;...&lt;/p&gt;  
&lt;p&gt;Yesterday I got a package I totally had forgot about.&lt;/p&gt;  
&lt;p&gt;A little more&lt;/p&gt;  
&lt;p&gt; than a week &#127772; ago I placed a bid on a motherboard and a few C  
PUs.&lt;/p&gt;  
&lt;p&gt;The bid I placed was 10&lt;/p&gt;  
&lt;p&gt; SKR = 1 &#127772; Euro and I did not think I would win but I did.&lt;/p&gt;  
</p>  
&lt;p&gt;The board was not really&lt;/p&gt;  
&lt;p&gt; anything I thought I &#127772; would use in this kind of build becaus  
e it lacks an ISA slot and I&lt;/p&gt;  
&lt;p&gt; like to have one should &#127772; I ever need it.&lt;/p&gt;  
&lt;p&gt;I placed a bid on the board because I was&lt;/p&gt;  
&lt;p&gt; curious and wanted to see how it &#127772; performed.&lt;/p&gt;  
&lt;p&gt;The board was sold as untested and had dirt&lt;/p&gt;  
&lt;p&gt; on it. At least I hope it is dirt...&lt;/p&gt;  
&lt;p&gt;I thought I &#127772; might aswell test the board at once. I&lt;/p&gt;  
&lt;p&gt; placed a Coppermine P3 933 in the socket and the system posted.&lt;/p&  
gt;</p>  
&lt;p&gt;I &#127772; installed Windows 98&lt;/p&gt;  
&lt;p&gt; and did some overclocking and performance tests.&lt;/p&gt;  
&lt;p&gt;I managed to beat my AX6BC + Tualeron&lt;/p&gt;  
&lt;p&gt; 1400@1400 SuperPi score &#127772; with the Coppermine @ only 1100 mhz  
</p>  
</p>  
&lt;p&gt;With the Tualeron 1400 I&lt;/p&gt;  
&lt;p&gt; managed to improve its overclocked SuperPi score even though &#127772;  
this board cant beat the&lt;/p&gt;  
&lt;p&gt; Aopen AX6BC clock for clock.&lt;/p&gt;  
&lt;p&gt;This will probably be the motherboard I will use in my&lt;/p&gt;  
&lt;p&gt; &#127772; Windows 98 build for DX7 + DX8 games ¢.&lt;/p&gt;  
&lt;p&gt;This board does not suffer from any of the&lt;/p&gt;  
&lt;p&gt; problems my Aopen AX6BC &#127772; shows.&lt;/p&gt;  
&lt;p&gt;I will also be able to use a P3 1400-S. [FSB &gt; \*] seem&lt;/p&gt;  
&lt;p&gt; to be accurate for these platforms.&lt;/p&gt;  
&lt;p&gt;This &#127772; board is not a 440BX board as planned but what&lt;/p&gt;  
</p>  
</p>  
&lt;p&gt; is it?&lt;/p&gt;  
&lt;p&gt;Who can identify the motherboard?&lt;/p&gt;  
&lt;p&gt;The Video Card has also &#127772; been changed, at least&lt;/p&gt;  
&lt;p&gt; for the moment, can someone recognize it?&lt;/p&gt;  
&lt;p&gt;&lt;/p&gt;
